

Welcome to Day Two!

Scotland's Land Reform Futures International Symposium

12 November 2025

Professor Lee-Ann Sutherland

Director of International Land Use Study
Centre

The James
Hutton
Institute

About the Hutton Hub

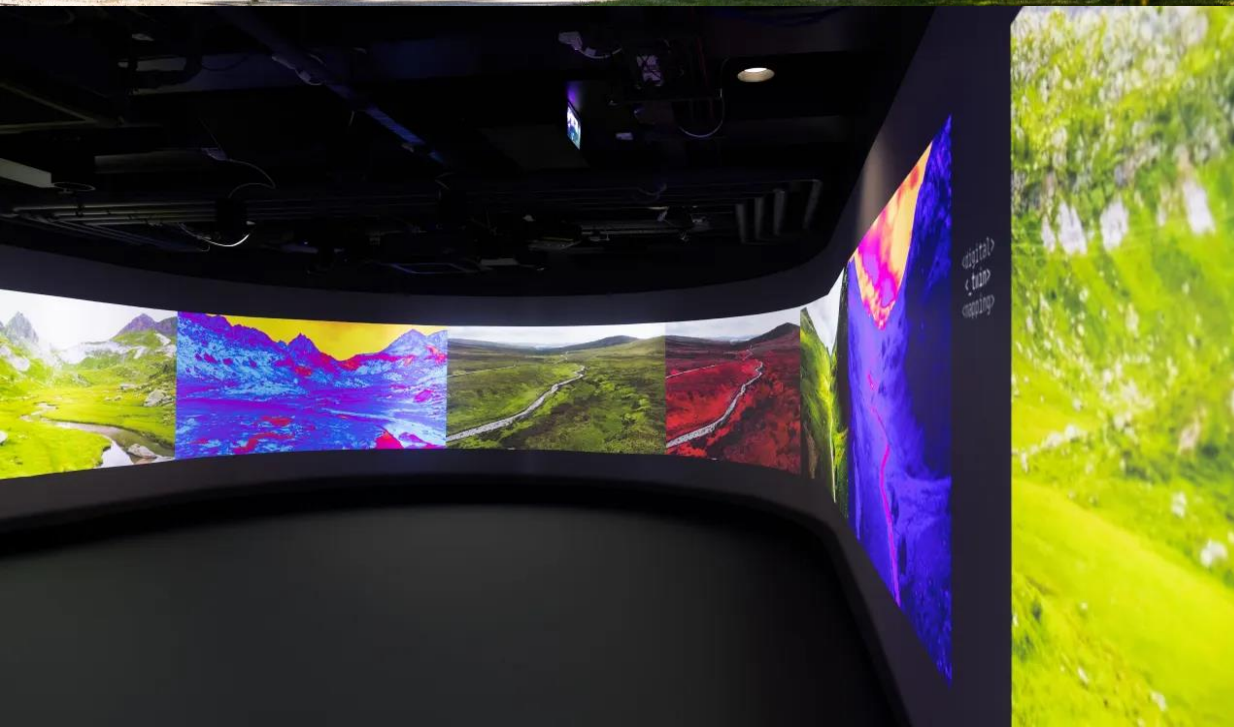

The multi-million-pound development offers a space for academics, businesses and the public to collaborate and use cutting-edge technology to help the north-east achieve a Just Transition to Net Zero.

Financed by

- The Scottish Government's Just Transition Fund for the North-East
- The Macaulay Development Trust
- The UK Department for Science Innovation and Technology

Technology and facilities are open for hire!

Contemporary research and engagement

Modelling | Virtual Reality | Co-development

- Affective images influence change
- Complex processes require interactive modelling
- Co-development enables just solutions
- Open research enables evidenced-based responses

Innovative Research

New research potential

Modelling | Virtual Reality | Co-development

Topics include:

- Therapeutic benefits of virtual greenspace and green prescribing
- Co-development of evidenced based-nature-based solutions
- Citizen science into digital solutions for climate change
- Spatial analysis of the impact of land use interventions in real time
- Creative methodologies for increasing the diversity and inclusivity of collaborative processes

What's coming next!

- Green Skills Academy
 - Peatland restoration train the trainer
- Outdoor learning
 - Sculpture trail
 - Outdoor learning centre
 - Aberdeen City Rangers
- Café!

An aerial, top-down view of a circular path in a lush green field. In the center of the path is a large, white, spherical sculpture. Several people are gathered around the sculpture, looking at it. The field is filled with green grass and small yellow and purple flowers. The overall scene is bright and natural.

Capacity Building
